1900.

69TH YEAR OF THE ALBANY SEED STORE.

TO CUSTOMERS.....

N issuing our Annual Catalogue for 1900, we again inform our patrons that Mr. E. T. Reed retired from business a year ago last September, and Mr. Geo. H. Price, who has been the managing partner for the past 32 years, under the firm name of V. P. Douw & Co., Price & Knickerbocker and Price & Reed, continues the business in his own name. He thanks you for your patronage for the past 32 years and hopes you will continue to give him a fair share of your custom. The seeds offered are of the very best sorts and strains to be obtained. We use the greatest care to keep the stocks first-class in every way, and can confidently assert that none better can be had.

Some varieties are very scarce this season, owing to the continued drouth of last summer. This applies especially to Beans, some varieties of Peas, Onion and Cabbage. Nearly all kinds are scarce, but not as short as the above-mentioned sorts. The prices are a little higher than last year on some kinds, but, considering the scarcity and quality, are very low, therefore it will be well to order early.

How to Order.—In writing out your order, do it as plainly as possible, *and be sure to sign your name distinctly*, giving post-office address, county and State, in full, and also express office, for many times it is better to send by express than by mail. Each year we have orders we cannot fill because they are *unsigned*. Make your order out as soon as possible. It will be an advantage to you and a favor to us.

How to Remit.—Send money by post-office or express money order, registered letter or draft. We guarantee the safe arrival of money sent in this way. Postage stamps received as cash when notes are not obtainable, or to make proper change. (Two-cent stamps preferred.) We Pay the Postage to all parts of the United States on the seeds mentioned in this Cata.

We Pay the Postage to all parts of the United States on the seeds mentioned in this Cata, logue in packets, ounces and pounds, without adding anything to the list price, except where specially noted.

Remember, the Mail and Express bring Our Store to Your Door.

It costs no more to buy of us from a distance than if you came into our store and purchased seed over our counter.

Please observe that though we prepay the postage on seeds, as above stated, we make no addition to our Catalogue price to cover this outlay. *Peas, Beans, Sweet* and *Field Corn*, when ordered by mail, five cents per pint and ten cents per quart must be added to the price list for one-half the postage, and for *Onion Sets* eight cents per quart, and for *Bird Seed* fourteen cents per quart.

We fill Orders Promptly.—We aim to fill orders and dispatch them immediately after receipt, unless some special cause prevents, in which case acknowledgment is made and explanation given. Where no shipping instructions are given, we send by the best route we know of. Packages too large to send by mail we shall send either by express or freight. We fill an order for ten cents' worth of seed with the same promptness and care as one for fifty dollars. We guarantee the safe arrival of all packages.

We Test.—All our seeds are thoroughly tested before we sell them, in a most careful manner, and only those that *grow well* do we send out. This, in connection with our system of having to do only with the *best stocks* and carefully watching the crops, affords ourselves and customers the best protection possible.

My long experience for the past 32 years in the growing, selecting and improving of stocks enables me to supply customers with seeds that cannot be surpassed.

We do not warrant seed, because, as is well known, so many causes may, and often do, prevent the best seeds from growing and producing crops, from no fault in the seeds. We, therefore, in common with all other reliable seedmen, wish it distinctly understood that, while we exercise very great care to have all seed pure and reliable, we sell no seeds with warranty, express or implied, in any respect, and will not be in any way responsible for the crop. If the purchaser does not accept the seeds on these terms they must be returned at once, and the money that has been paid for the same will be refunded.

Novelties and Flower and Uegetable Seeds of Merit.

Aster, Christmas Tree. A distinct early blooming race of peculiar habit, branching out horizontally in the shape of a fir tree. It grows about eighteen inches high, the lower branches having a spread of two feet, from 80 to 100 flowers often appearing on one plant. Mixed colors, per packet, 25 cents.

Dianthus Heddewegii Diadematus Albus Fl. Pl. Double White Diadem Pink, originated from the popular diadem pink. It has a pure white ground color from which stand out in beautiful contrast those delicate and velvety feathered lines, to which the diadem pink owes its popularity. The tints being lilac, purple, carmine and red. Fine for boquets or cut flowers.

Reseda Odorata Maxima. Red Goliath Mignon ette. It bears larger flowers than any other Mignonette, the centre spikes being often S inches long. The plant grows in candelabra form and produces fiery red flowers on firm upright stalks. A very effective variety. Per packet, 20 cents.

Salvia Splendens, Silver Spot. The intense scarlet flowers of this type make a striking contrast to the soft dark green foliage which is liberally sprinkled with light sulphur or cream colored spots of various sizes. Per packet, 25 cents.

Dianthus Stellaris, Star Pink. A charming sport from the Dianthus Heddewegii, each flower having the shape of a 5 or 6 pointed star. All colors of the class are represented; it blooms profusely from the middle of June until October. Per packet, 20 cents.

Aster, Ostrich Plume. The plants grow from 15 to 15 inches high and are of a strong, luxurious branching habit. The flowers, measuring 4 to 5 inches in diameter, are borne on long stems. The petals are long, wavy and so tinted as to give an extremely fine effect, after the style of the comet. In color it is a fine white, changing to rose. Per packet, 20 cents.

Reseda Odorata Erecta Aurea. (New 1900 Mignonette.) Forms a semi-globular bush of the most perfect shape, measuring 24 inches in diameter, often throwing up over 400 upright spikes of massive goldenyellow flowers. Per packet, 20 cents.

Morning Glory -- Imperial Japanese. A class of Morning Glory from Japan. The flowers are of exquisite beauty in form and coloring, and of enormous size, often 5 or 6 inches in diameter: are easily cultivated, and grow rapidly about 30 feet high; colors vary from white, rose, crimson, carmine, blue and purple, some being mottled, striped, penciled and bordered in great diversity; foliage is often prettily variegated. Per packet, to cents.

Semple's Late-Flowering Branching Aster. Superior to any other class of late-flowering branching Asters The flowers are large, 4 inches across, very double, of purest colors, and borne on long stems. Begin blooming about 1st of September and continue until frost; grow about 18 inches to 2 feet high. Mixed colors, per packet, 10 cents.

Price's Danish Beauty Canliflower. A large, solid, white-headed variety; sure to head and early. Per packet, 25 cents; per ounce, \$5.00.

New Trimmph Radish. A beautiful globe-shaped variety. Has a white ground with handsome bright scarlet stripes running horizontally over the white. It is good for both forcing and open ground, as it grows quickly and is short leaved; very ornamental on the table. Per packet, 10 cents.

Price's American Breakfast Muskmelon. A fine, new sort, with thick golden-yellow flesh; good sized, fine flavored, finely netted skin; a fine sort and worth a trial. Per packet, 10 cents; per ounce, 15 cents.

Price & Reed's Early Forcing Radish. Has a small top, skin of a beautiful scarlet color, flesh white and crisp; will grow in 21 days. Per packet, 5 cents; per ounce, 10 cents.

Price's Albany Market Radish, of a beautiful rose color, running into white half-way down; good sized medium long. Per packet, 5 cents; per ounce, 10 cents.

Paul Rose Muskmelon. This fine new redfleshed melon is very sweet and high flavored, combining the good qualities of the netted Gem and Osage, from which it originated. Skin finely netted, flesh red and very thick; fine grained with small seed cavity. Per packet, Io cents; per ounce, I5 cents.

Price & Reed's Long-Keeping Celery. It has large, solid stalks of fine texture, crisp, brittle and tender, a very fine keeper, remaining in good condition longer than most any other sort. Per packet, 10 cents; per 02., 35 cents.

New Victoria Spinach. It has large, fleshy, curled leaves, is early and productive. Per packet, 5 cents; per ounce, 10 cents.

Seibert's Early Lima Bean. The earliest true lima grown. The vine is productive, hardy and vigorous. The pods are large, thin and easily opened. Beans large, tender and succulent, a very fine sort, much better than the old variety, which is late. Per packet, 10 cents; quart, 40 cents.

Price & Reed's New Extra Early Colossal Sweet Corn. A fine large extra early sort, ears set well down, stalk 5 feet high, good and strong. Kernel large, plump, white and sweet, ears large as the Champion and a week earlier. *It is the earliest of all large sweet corns.* Per packet, 10 cents; quart, 25 cents.

Price & Reed's Perfection Sweet Corn. This variety is a large early sort, ears plump and twelverowed, growing on stout, strong stalks about six feet high. It is early and prolific, with large, white, sweet and tender kernels. The cob is white, long and thick. A fine market and table variety. It is well worthy a trial. Per packet, Io cents; quart, 25 cents.

VEGETABLE SEEDS.

ARTICHOKE.

CULTURE. The seed should be planted about the beginning of May, in open ground, highly enriched with plenty of well-rotted cow manure, and kept clear of weeds. Water frequently if the weather is dry. Seedlings should be set in rows 3 feet apart each way.

Pr pkt Pr oz - \$0 10 \$0 30

Green Globe

ASPARAGUS.

ASPARACUDS. Sow the seed in the Spring as early as the ground will permit, in rows 1 foot apart. Soak the seed twenty-four hours in warm water. Cover about 1½ inches, and press the earth down by treading or rolling. Carefully hoe and keep free from weeds. When two years old trans-plant to permanent beds, no base being required. Plow or dig the ground 9 or 10 inches deep. Set in rows 12 inches apart and 15 inches between the rows. Top-dress the bed with 3 inches of old, well-rotten, pulverized manure. Every Autumn the stalks should be rolled down, and in the Spring top-dressed with old, rotten manure, and sprinkle the bed well with salt. Never use a fork on the bed, as it injures the crown. Should not be cut until the plants are three years old. and then as near the surface as possible.

STOCK BEETS. A Reduction in Prices Made for Large Quantities.

DANVERS LONG ORANGE CARROT. CARROT.

New York State, we list the four following varieties Beets, which the department at Washington and the N State experimental station have decided are the best kinds for producing sugar in this locality.
KLEIN WANZELBEN. A variety which is
used extensively in Germany and France. It con-
tains a good percentage of sugar and will do better
on poorer soils than the other varieties, being a little
hardier and growing to a good size
LANE'S IMPERIAL WHITE SUGAR. An improved variety, grows to a large size, very
prolific, fine for stock, has a large percentage of
sugar
Vilmorin's Imperial Sugar. Prolific, retains
its sugar a long time
White Sugar. Exclusively grown for sugar and
excellent for stock
Long Red Mangel Wurzel. A large, long
variety; grows well out of ground
Carter's Mammoth Long Red Mangel
Wurzel. This is a fine stock of Long Red, grows to an immense size, of very fine texture
NORBITON'S GIANT LONG RED MAN-
GEL WURZEL. Excellent, growing well out
of ground, with a small top, very large, of fine grain
and an-enormous yielder. This is the best long va-
riety and the one to sow
GOLDEN TANKARD MANGEL WUR-
ZEL. A valuable variety, of fine form and sweet flavor, color a bright yellow
Yellow Globe Mangel Wurzel. Roots of
large size and of globular form
Warden's Orange Globe Mangel Wurzel.

CURLED or PEPPER GRASS	ν φυ πι	00	10
Broad Leaved	5 10)	70
True Water 10) 40	4	00

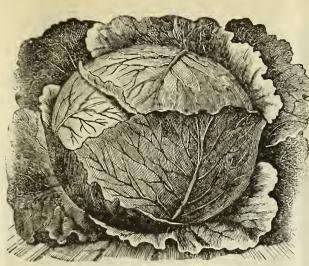

CARROT.

Sow as early in the Spring as the ground can be worked, in a rich, light soil, well manured with old, fine manure and thoroughly worked very deep. Fresh stable manure is liable to make them fork and branch. Land that was heavily manured the previous season is the best. Plant in rows fourteen inches apart in the garden, but from twenty to twentytwo inches in the field, and thin plants to five or six inches in the rows, hoeing often between them, just enough to kill the weeds, otherwise the roots tend to branch or fork. For general crops sow during May.

Packets of each variety, 5 cents.

	I	Proz P	r lb
	Extra Early French Short Horn. For forcing the earliest variety, roots small and fine flavor	\$0 10 \$	\$ 90
	Early Horn. Early variety and much used for feeding milch cows; also used for the table	10	70
	Chantenay. A productive stump-root variety	10	65

	Long White Belgian. Good for feeding	10	50

READ REMARKS ON PAGE 2.

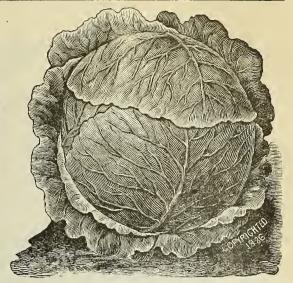

P. & K. LARGE BRISTOL CABBAGE.

CABBAGE.

Early varieties should be sown in hot-beds during February and March, transplanted into very richly-manured ground about the middle of April. The ground should be loosened and worked up thoroughly to grow large and good heads. Hoe often to kill weeds, and draw earth up to the stems. For later crops sow in shallow drills (4 to 6 inches apart), in April or May. To keep off the "Hy," soot, wood ashes, lime and tobacco dust, or any or all, should be used freely, very early in the morning; one day's neglect may spoil the plants. Set during the month of June, in rich ground 3 feet apart.

Packets of each variety, 5 cents.		
Early Jersey Wakefield (True). Very early; fine	'r oz	Pr lb
cone-shaped	35	\$4 00

ALL SEASONS CABBAGE.

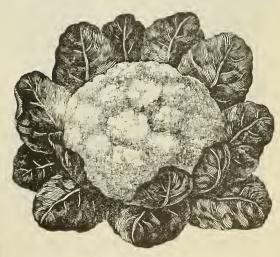

CORN SALAD OR FEITICUS.

Sow in drills a quarter of an inch deep and 6 inches apart, the latter part of August, or in September. Tread in the seed *lightly* if the weather is dry. Keep free from weeds and cover thinly with straw or leaves just before Winter.

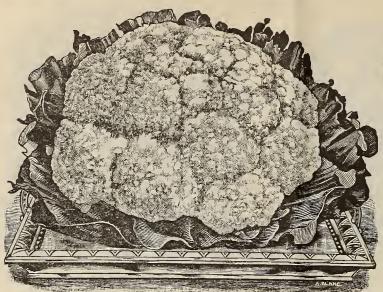

Corn	Salad	 \$0	05	\$0	10	\$0	75

SURE HEAD CABBAGE.

P. & R. SELECTED SNOWBALL CAULIFLOWER.

EXTRA EARLY SELECTED DWARF ERFURT CAULIFLOWER.

CAULIFLOWER.

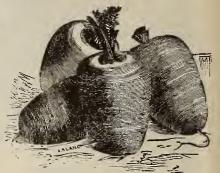

Should be sown in hot-beds in February, transplanted into another frame in the latter part of March, and in May planted out in rows 3 feet apart, 2 feet between plants. Any good cabbage soil will grow cauliflower, as their requirements are almost similar. If the weather is dry, water freely. The large leaves should be broken down over the flower head as they appear, to keep the sun and rain from injuring them.

Prpkt Proz

best early variety	25	5
Extra Early Dwarf Erfurt. Fine popular strain	20	3
Early Dwarf Erfurt. Good heading qualities	20	2
SNOWBALL. (<i>Selected.</i>) A very early variety, with firm, white heads and good heading qualities	20	3
NONPAREIL. fine; late; good for general crops	10	

IMPROVED WHITE SPINE CUCUMBER.

OXHEART CARROTS.

CELERY.

Should be sown very early in the spring, in open ground or in the hot-bed. When 8 inches high, transplant 4 inches apart into a rich, finely pulverized soil. If the weather is dry, press the earth well around the roots. Water and protect till well rooted; shear off tops once or twice to make them stocky, then transplant into rows 3 or 5 feet apart, in well manured shallow trenches, or on the surface, setting the plants 6 inches apart. To blanch, draw the earth around the plants.

Packets of each variety, 5 cents.

Selected White Plume. A half dwarf variety, very crisp, tender. Inner leaves and heart white. To blanch, close the stalks and draw the soil up, using great care not to get the earth in the center or heart of the stalk, as it will tend to keep it from making a perfect head. It should not be handled when wet with dew or rain, as it will cause it to rust. It is a fine variety for early use, as it stands the heat of Summer better than most sorts	i o 2 50 30	\$3 50
GOLDEN SELF-BLEACHING. Is of dwarf, com- pact growth, with very stocky, vigorous, straight stalks. The ribs are solid, crisp, tender and of good flavor. It is a strong grower, and like the White Plume, requires very little labor to blanch. With hardly any banking or cover- ing up, the outer ribs become a yellowish white and the center a rich, golden yellow. It is also a good keeper		4 50
PRICE & REED'S LONG KEEPING. Has large, solid stalk, of fine texture, crisp, brittle and tender, and is a fine keeper, remaining in good condition longer than any sorts	35	4 50

CELERY PLANTS.

(See Vegetable Plants, Page 23.)

GOLDEN HEART. LONG KEEPING. GOLDEN SELF BLEACHING.

CELERY PLANTS READY DURING JULY AND AUGUST.

SWEET CORN.

Plant about the middle of May or as soon as the ground is dry (if planted too early, corn is apt to rot; the late varieties are more liable to rot than the early ones), in hills three feet apart each way; seven or eight kernels in a hill; hoe often and draw up the soil to the stems; thin to four stalks and break off side shoots. Use plenty of old, fine manure. For succession, plant every two or three weeks until the last of July.

Packets of each variety, 10 cents. Pints 10, and 13 cents. By mail add 10 cents per quart for Postage.

CUCUMBER.

For main crop, plant the seeds in open ground, as soon as the weather becomes warm and settled, in hills 4 feet apart, using a shovelful of warm, well-rotted manure to each hill; cover manure with 2 inches of fine earth, and plant 8 or 10 seeds in each hill; cover these with one-half inch of soil firmly pressed down. Hoe often, and when out of danger of insects, thin out to three or four plants in a hill. Fruit should be plucked when large enough, whether required for use or not, for if left on the vines it destroys their productiveness. on the vines it destroys their productiveness.

Packets of each variety, 5 cents. Proz Pr lb

NEW YORK EGG PLANT.

DWARF CURLED KALE.

MARTYNIA.

Plant in May, in open ground, 3 feet apart; leave one plant in each hill, or sew in hot-bed and transplant. Pick when the size of the little finger to make nice looking pickles; for general use, as long as a knife blade will penetrate easily.

MUSHROOM BED.

MUSHROOMS.

Mushrooms may be grown in a cellar or shed, or in beds prepared in the open air, in the same manner as hot-beds. Take fresh horse droppings and mix with about the same weight of loam. Turn and mix every day until the required amount is obtained. When the heap has cooled off to about 90 or 95 degrees make the beds 4 feet wide and 8 inches deep, each layer firmly trodden down. When the temperature has fallen to about 90 degrees put in the spawn, in pieces about the size of a hen's egg, 2 inches deep and 12 inches apart each way; in 10 or 12 days cover with 2 inches of hay or straw. The temperature should be as nearly uniform as possible, but should range only between the extremes of 50 and 70 degrees. They will appear in from 4 to 6 weeks. English (in bricks), per ib., 15c; by mail, 25c.

PEA Northern Growth, all Hand Picked.

Plant as early as the ground can be worked, in single or double rows from 3 to 4 feet apart, about an inch apart in the row and 3 inches deep. (In summer they should be planted 6 inches deep.) Hoe often. They will mature earlier in a light, dry soil, especially if manured the previous season, but should not be manured too highly at the time of planting. If they grow too fast, and show no signs of bloom, run a spade down on each side, about 6 inches from the row, and thus root prune them, which will cause them to bloom in a few days. For a succession plant every two weeks during the season. For early peas the soil should be light, warm and sheltered, but for general crop a moderately heavy soil is better.

By mail, add 10 cents per quart, 5 cents per pint. See page 2.

* Wrinkled varieties, the best and sweetest, should be planted much thicker, being liable to rot.

Large packets of each variety, 10 cents; where quarts are quoted, 20 cents; pints are 13 cents; quarts, 15 cents; pints, 10 cents.

POTATOES.

Good Seed Potatoes are scarce this season and prices are liable to advance.

The potatoes we offer this season were specially grown for seed in the north of Michigan, at foot of Lake Superior. They are grown on new ground and are entirely free from rot, scab and all disease. They are true to name, clean and smooth; the very best for seed. Potatoes grown in this section last season were not successful crops, owing to the dry, unfavorable weather. New seed stock, such as we offer, will this year be more desirable and advantageous to use than ever before.

They will ensure earlier and better-sized crops than could be had by using any potatoes grown about here last year. The prices we quote are not really high considering the very fine stock we offer.

We recommend that those of our customers who want new seed potatoes send us their orders early, as our stocks are limited and cannot be replenished.

are limited and cannot be replenished. We have listed a few varieties. These are the newest and leading sorts of the many kinds of potatoes now claiming public attention. The prices are liable to variation as the season advances and our stocks be-come exhausted. Of late years great attention has been paid to the im-provement of existing sorts of potatoes and the introduction of new kinds, but this has been chiefly upon the part of those who are interested in them as an article of sale. There is, however, no more economical investment than the money paid out for improved varieties. Changing your seed will be sure to improve your crop and bring much better quality and heavier yield. In this way you will be repaid a hundred fold. The prices at which we have listed our potatoes are reasonable for this season, and we can recommend them as being true to name, northern grown, from carefully selected first-class stocks. Single pounds sent by mail for 30 cents ner nound.

Single pounds sent by mail for 30 cents per pound, or 4 pounds for \$1.00. Barrels contain 160 lbs. of potatoes,

potatoes, —— PHICE & KNICK ERBOCK ER'S EARLY SUNRISE POTATOES. The earliest of all. It still grows in favor every year. Has given more universal satisfaction than any sort ever offered since. the Early Rose. Planted with all the earliest kinds, it was ripe in ad-vance of any, producting potatoes fit for the table in fifty days from the time of planting. The tubers are oblong, large, solid, uniform and handsome, flesh white, fine grained and dry, cooking well, even when first dug; very productive and of fine keeping qualities; vines dark green; good, strong growers. It has yielded at the rate of 550 bushels to the acre. Per peck, 75 cents; per bushel, \$2.00; per barrel, \$4.00. BOVEEE. Fine new variety, tubers of oval shape, growing large and compactly in the hill; flesh fine grained, dry and white. It is very early and a large yielder. Per peck, 75 cents; per bushel, \$2.50; per barrel, \$4.50.

Barrels contain 160 lbs. Potatoes.

Barrels contain 160 lbs. Potatoes. Honeoye Rose. A fine, new early variety, originated from the old Early Rose and Victor Rose. It is very early. Tubers all large and good shape; color pale pink, reddish around eyes. Flesh fine, white as snow and of fine flavor; excellent cooking quality. It is an enormous yielder. Per peck, 75 cents; per bushel, \$2.50; per barrel, \$4.50. EARLY THOROUGHIBRED. Tubers, oblong in shape, smooth, handsome, of a light blush color, a good cropper and early. Per peck, 75 cents; per bushel, \$2.50; per barrel, \$4.50. Sir Walter Raleigh. A fine medium variety; flesh white, fine grained and a good yielder. Per peck, 60 cents; per bushel, \$2.25; per barrel, \$4.00.

EARLY NORTHER. This fine early variety seems to do well on all soils, producing a large crop. The tubers grow to a large size and have a handsome appearance. In shape and color it resembles the Early Rose, from which it originated. Per peck, 75 cents; per bushel,

Early Ohio. Oblong in shape, skin and flesh white, very early and a good cooker. Per peck, 75 cents; per bushel, \$2.25; per barrel, \$4.50.

NEW QUEEN. An early sort, with white flesh and skin of blush tinge, shape oblong. An excellent yielder. Per peck, 60 cents; per bushel, \$2.0); per barrel, \$4.00.

Extra Early. (Burpees.) Very early and productive, tubers of good size, very smooth, fine, uniform, oblong shape, growing very compactly in the hill, skin white, slightly shaded pink, flesh pure white, of very fine grain. Per peck, 60 cents; per bushel, \$2.00; per barrel, \$4.00.

of very fine grain. Per peck, 60 cents; per bushel, \$2.00; per barrel, \$4.00.
EARLY 6 WEEKS. This potato is said to produce fair size remarkable tubers in six weeks from time of planting. It grows medium to large size, oblong to round shape, light flesh colored skin, white flesh, smooth. Per peck, 75 cents; per bushel, \$2.50; per barrel, \$4.50.
Lightning Express. Grows large, keeps well, very productive; skin white, pinkish cast. Shape, oblong, slightly flattened; and very early. Per peck, 75 cents; per bushel, \$2.00; per barrel, \$4.50.
Early Maine. Early, smooth and regular; first-class in every way. Per peck, 60 cents; per bushel, \$2.00; per barrel, \$4.00.
Early Excel. An early oblong variety. Smooth and regular, a good cropper and keeper, with good table qualities. Per peck, 60 cents; per bushel, \$2.00; per barrel, \$4.00.
Clarkes. Early and productive. Per peck, 60 cents; per bushel, \$2.00; per barrel, \$4.00.
Early Rose. A true stock of that fine old variety. Per peck, 60 cents; per bushel, \$2.00; per barrel, \$4.00.
Money Maker. A long, handsome, fine shaped, smooth, late, white variety. Eyes nearly even with surface; very fine grained, with good coking qualities; a strong grower and enormously large yielder. Per peck, 75 cents; per bushel, \$2.25; per barrel, \$4.50.
Carman No. 3 produces large uniform handsome tubers, slightly flattened; growing close to the plant. The skin and flesh extremely white, and its cooking qualities are excellent. It is a strong grower and an unusually large yielder; ripens among the later sorts. Per peck, 75 cents; per bushel, \$2.00; per barrel, \$4.00.

BIRD SEEDS.

If you wish to keep your Birds in good condition and have them sing well, feed them good Bird Seed. We sell only the very best Sicily Canary, English or German Rape, German Millet and Russian Hemp. One trouble with the common Bird Seed sold in boxes in the stores, is that it contains common Smyrna Canary, oftentimes musty, which, of course, is injurious to your Birds. Our seed, mixed of the very best quality, costs less than that sold in boxes. We sell at 12 cents per quart or 6 cents per pint. The boxes you pay 10 cents for contain a pound; we sell a pint at 6 cents, which is nearly a pound; three pound packages would cost you 30 cents; three pints, which weigh 3 pounds lacking 2 ounces, would cost 18 cents, which is a saving of 12 cents, besides having the best quality. You are paying for the box and the fancy label on it; bear this in mind when you want Bird Seed.

Mixed Bird Seed. Mixed of Sicily Canary, German Rape, German Millet and a very little Russian Hemp; just enough to keep your birds in good condition, 12 cents per quart; 6 cents per pint.

Canary and Rape. 12 cents per quart; 6 cents per pint.

Clear Canary. The best Sicily. 12 cents per quart; 6 cents per pint.

English or German Rape. 15 cents per quart; 8 cents per pint.

Hemp, best Russia. 15 cents per quart; 8 cents per pint.

Washed Silver Sand. 10 cents per quart; 5 cents per pint.

Gravel Paper. 25 cents per package.

Song Restorer. For restoring birds' song; also acts as a tonic for improving the plumage. Per bottle, 25 cents.

Bird Invigorator. A tonic for loss of feathers, hard breathing, asthma, and all diseases to which birds are liable. 25 cents per bottle.

MOCKING BIRD FOOD. For all soft bill birds, such as Mocking Birds, Thrushes, Robins, Nightingales, etc. Per bottle, 40 cents.

ROUGH RICE, per quart, 25 cents.

SUNFLOWER, per quart, 20 cents.

PARROT SEED, Rough Rice, Sunflower and Hemp, mixed, 20 cents per quart.

MAW, 5 cents per ounce.

Bird Lettuce, 10 cents per pound.

Cuttle Fish Bone, 5 cents each.

Cage Cups, all styles, Porcelain, Tin Top, Glass, etc. Cage Gnard, for putting around cages to prevent

throwing the seeds on the floor.

Swings, Nests, Nesting, Perches, Cuttle Cuttle Fish Holders, Cage Fish Bone, Cuttle Fish Hold Springs, etc. Telephone No. 968.

FERTILIZERS AND PLANT FOODS.

These Fertilizers, or Plant Foods are made expressly for Plants or flowers growing in the House, Garden or Conservatory, and contain the same Plant Food as stable manure, but in a cleaner, more concentrated and soluble form. The stable manure is disagreeable to handle, slow in effect, and often breeding vermin about the roots of the plants, and, like guano, has an unpleasant odor. The Plant Food bas no unpleasant odor, is clean to handle, and being soluble, is immediately taken up by the plants, producing a quick and bealthy growth, with more abundant blossoms, of a richer color, than any other dressing will produce. It gives a rich, green color to the leaves and prolongs the period of blooming. It cannot injure the plant, and protects it from vermin. It can be dissolved in water or worked into the earth, and the effect will be seen in a week or ten days after the first application. Standard Fertilizers - Superphosphate for Field and all

Standard Fertilizers - Superphosphate for Field and all Garden Crops, 2% cents per lb. by bbl; \$38.00 per ton.

FOR THE LAWN.

PRICE & REED'S FINE MIXED LAWN GRASS is composed of a mixture of the best varieties of fine swarding grasses, especially adapted for seeding down lawns, door-yards, cemetery lots, etc., in this climate. It makes a short top and strong root, and when grown produces a soft, compact, velvety turf. A beautiful lawn can only be had by using a good mixture a careful study, and it has given great satisfaction. Before sowing, the soil should be thoroughly prepared by digging and raking so as to completely pulverize it; all stones and roots should be removed, and if low ought to be drained. Unless the ground is very rich, some fertilizer should be applied. Lawn Dressing is the best, as it helps the grass wonderfully to a quick, vigorous start and causes it to retain a bright green color. Sow the grass thickly and rake well in, not too deep, and roll if possible. With seed sown later than April or May, it is often well to sow a little oats, to protect it from the heat of the sum. With a little care a much finer grass plat can be obtained than by sodding.

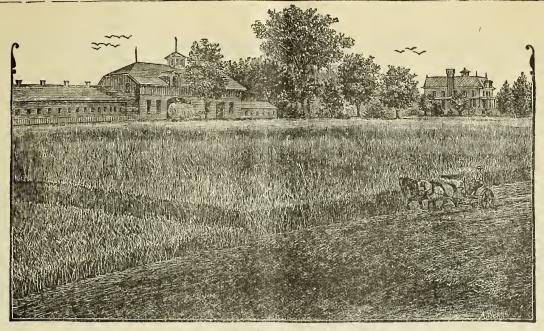

To Make Beautiful Lawns Use Lawn Dressing.

No Odor. No Lumps. No Weeds. Clean as Sugar to Handle. Inexpensive.

This dressing is prepared for Lawns, Grass Plats and Cemetery Lots, and it is so compounded as to contain all the Plant Food required by the lawn grasses. Within a short time after application it will produce a luxuriant growth of grass of a rich green color, and will last during the entire season. It is odorless, and the cost of applying is a mere trifle compared with the application of stable manure. It will not burn the grass, and is free from noxious weed seeds, found always with manure, and which are the pests of the lawn. A superior dressing for the Flower Garden.

DIRECTIONS.—Sow broadcast over the surface when the grass is dry. 5 lb. bag, 50 cents; 10 lb. bag, 75 cents; 25 lb. bag, sufficient for 2, 500 sq. ft., \$1.25; 50 lb. bag, for 5,000 sq. ft., \$2.50; 100 lb. bag, for 1-4 acre, \$4.50.

SEEDS. \mathbf{GR} ASS

SUBJECT TO VARIATIONS IN PRICES TO CORRESPOND WITH THE MARKET. Special quotations on large quantities will be given at any time.

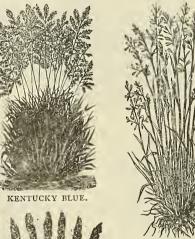

We call especial attention to our Grass Seeds, which are not to be conformed with the ordinary grades offered in the open market. They are selected with care, and are much more economical to use than the common qualities. Add 5 ets. per qt., 8 ets. per. lb. on grass and clover when ordered by mail.

LAWN GRASS. (See page 24.)

LAWN GRASS. (See page 24.)
 REDTOP (Agrostis Vulgaris). Time of flowering, July; height, about 18 inches. A valuable permanent perennial grass, growing in almost any soil, moist or dry, but reaching its perfection in a moist, rich soil, and standing hot weather well. It is frequently sown in mixture with Timothy and Red Clover. Sown alone takes about 3 but, to acre, about 10 lbs, to bu. Per qt. 25 cents; per bu, \$100; per 100 lbs, \$9,00
 REDTOP, fancy, recleaned. Same as above, but cleaned from all chaff and impurities. Per lb. 25 cents; per 100 lbs, \$20 00.
 FANCY EXTRA CLEAN, (FREE FROM CHAFF)
 BLUE GRASS (Poa Pratensis), Kentucky, also known as Junc Grass, Green Grass, etc.; perennial, flowers in June; height, 10 to 15 inches. This is a valuable grass for pasture' and suited to a variety of soils, from moderate dry to a moist meadow. It is very productive and of early growth in the spring, furnishing excellent food for all kinds of stock throughout the season, standing the hottest weather well, and makes a good quality of hay, though the yield for this purpose is not equal to some other varieties. Alone sow about 3 bu, to the acrc, 14 lbs. to the bu. Per bu, \$200.
 RHODE ISLAND BENT GRASS (Agrostis Caniua). Time of flowering, June and July. It is of a hardy, creeping habit, and good for close sward. For pasture sow about 3 bu, 12 lbs, to bu. Price per qt, 25 cents; per bu, \$300.

bu., \$3.00.

Biowering, June and July. It is of a hardy, creeping habit, and good for close sward. For pasture sow about 3 bu., 12 lbs. to bu. Price per qt., 25 cents; per the start of th

CRESTED DOGSTAIL.

RED TOP.

URCHARD GRASS.

GRASSES-(Continued).

ENGLISH RYE GRASS (Lolium Perenne). Perennial; flowers in June; height, 20 incbes. It is a staple grass of Great Britian, and largely used in the composition of many of the meadow and pasture mixtures. Its natural adaptation to almost all cultivated soils, and its early maturity are the causes of its extensive use. It yields an abundant foliage and is valuable as a bay crop when cut in blossom. About 2½ bu. to acre; 24 lbs. to bu.; 25 cts. per qt.; per bu., \$2.50; per lb. 18 cents USALLAN BYEC (I Oblume I Collared). Bioarcicle downers in

to acre; 24 lbs. to bu; 29 cts. per dt.; per bu, \$2.30; per lb. 18 cents **ITALIAN RYE (Lolinm Italium).** Biennial; flowers in June and July; height, 2½ feet. One of the most valuable grasses in Europe, being suited to all climates and very valuable to use in mixtures for pastures in this country. It produces an abundance of nutritious feed early in the Spring, and continues through the season until late in the Fall. Not being a perennial it is unsuited for permanent pasture, but for temporary use it is unsurpassed; 18 lbs. to bu.; 3 bu. to acre; 25 cts. per dt.; per bu., \$2.00

HARD FESCUE (**Festuca Duriuscula**). Perennial; flowers in June; height, 24 inches. Thrives well in a great variety of soils, one of the best grasses for general purposes, resisting drought well. It grows easily, and the foliage is of very good quality, and when cut makes superior hay. It stands heat and cold and does well in dry situations, where many other grasses would fail; 2½ bu, to acre; 12 lbs. to bu.; 25 cts. per lb, per 100 lbs., SIS.00.

SHEEP FESCUE (Festuce **Ovina**). Perennial; flowers June and July; 10 to 15 inches high. Fine for upland and dry pastures. It is short and dense in growth, and of excellent quality, though small in quantity. Sheep are very fond of it; 2½ bu, to acre; 12 lbs. to bu.; 20 cts. per lb; \$16.00 per 100 lbs.

SWEET VERNAL (Anthoxanthum Odoratum). Perennial; flowers May and June; height, $1\frac{1}{2}$ to 2 feet. Very valuable on account of its fragrance imparted to grasses grown with it when dried for hay, which makes the stock relish it. It is early and continues quick growth after being cut through the season; 3 bu, to the acre; about 10 lbs to bu.; per lb., 50 cts.

TINOTHY (Phleum Pratense). Also known as Herd's Grass. Perennial; flowers June and July; height, 3 feet and upwards. As a crop for hay, sown alone, Timothy is unsurpassed. On good, rich soil, it is very luxuriant, and attains a height of 4 to 5 feet, and even on poor soils it yields a fair crop. When cut soon after blossom it makes magnificent hay. % bu, to acre; 45 lbs to bu; 20 cts. per qt.; per bu, market price. market price.

GOLDEN MILLET (Panicum Miliaccum). Annual; an improved variety, medium early, growing from 4 to 5 feet higb. Is one of the best crops we have for cutting and feeding green, or for soil-ing purposes. Its yield is large when grown on good land. Its luxuriant leaves, juicy and tender, are much relished by stock. Heads closely condensed and spikes numerous. For hay it should be cut while in blossom otherwise it becomes tough and wiry; 48 lbs. to bu.; about \$2.00 per bu.

GERMAN MILLET, 48 lbs. to bu., per bn. **HUNGABIAN GRASS (Panicum Germanicum)**. An annual forage plant, with smaller stalks and heads than millet, though very succulent and furnishes an abundance of green fodder. Often yields 2 to 3 tons of hay per acre. It will do well in light, dry soils, although the better the ground the better the crop; 50 lbs. to the bu. Price, \$1.50 per bu.

CLOVERS.

In ordering by mail, postage should be added at the rate of 8 cents per pound for every quarter pound and upward.

(Special prices on large lots.)

MEDIUM CLOVER (Trifolium Pratense). Perennial, but of few years' duration. Price variable; 60 lbs. to bu.; 15 or 20 lbs. to acre; market price.

to acre; market price. **LARGE, MAMMOTH or PEA VINE CLOVER (Trifo- linm Pratense).** Valuable on light ground and for plowing under; 15 to 20 lbs. to acre; 60 lbs. to bu.; market price. **ALSYKE CLOVER (Trifolium Hybridum).** Perennial, Resembles in growth, etc., the Red Clover. Tbrives well in cold, wet, stiff soils. The blossoms are very sweet; bees are very fond of them. It will produce very little crop the first year, as the roots bave to get a firm hold of the soil. The second year it can be cut two or three times. The third year it comes into full vigor, and after that good crops can be cut for eight to ten years. About 12 lbs. to acre. Per lb., 18 cts.

ALFALFA or LUCERNE CLOVER (Medicago Sativa). This clover is one of the best forage plants (green or as hay) that a farmer can cultivate, being very nutrilious for horses and cattle. No other green crop resists the drought better. It is no sooner mown than it pushes out fresh shoots. It will last for many years, shooting its tough and fibrous roots downwards to the depth of 10 to 20 feet below the surface till they are out of reach of drought. In the driest weather it will hold up its stems fresh and green when others droop for want of moisture. After it has become well set it can be cut three or four times in one season. It yields enormously after the first year, 6 to 8 tons of dry bay being reported as an average yield. The thicker it is sown the finer and better the hay will be; 20 to 25 lbs, of seed should be sown on an acre. If sown too thin it will have large coarse stems and yield very poorly. Plow deep, cultivate the ground well and put on plenty of seed and you will have a good yield and a good quality of hay, 20 lbs, to acre. Per lb, 18 cts.; per bu, special price. **SCARLET or CRIMSON CLOVER (Trifolinm Incar-natum)**. Annuai; grows about 20 inches high and has very strong roots going deep into the soil. It will make a good growth on land too poor and sandy to grow red clover or any grasses and will make a normous growth on good land. Does well in all places except wet land. Makes good hay or a fine soiling crop. Sow in Spring or Sum-mer, about 15 lbs, per acre. Per lb, 15 cts. 5 lbs, for 50 cents. **BOKHARA CLOVER (CIEIIOTUS Alba)**. Valuable for

BOKHARA CLOVER (Melilotus Alba). Valuable for soiling, grows from 2 to 3 feet high, and if sown in rich soil may be cut three ltimes, and yields 3 tons and upwards per acre. Good for bees. About 10 lbs. to acre. Per lb., 25 cts.

SERADELLA CLOVER, 20 cts. per lb.

YELLOW TREFOIL or **HOP CLOVER** (Medicago **Lupulina).** A prolific and hardy variety, well adapted to use in mixtures with Red Clover and grasses. Well adapted for dry pastures, but should not be sown alone. About 15 lbs. to acre. Per lb., 20 cts.

WHITE DUTCH CLOVER (Trifolium Repens). Valuable in mixture for permanent pastures, forming, in conjunction with natural grasses, the finest and most nutritious food for cattle and sheep; also valuable for lawns and grass plats. Best imported. Per

sheep; als lb., 40 cts.

- AND ----

DIRECTIONS FOR THEIR USE.

Annuals are plants which, raised from seed, perfect the flowers, ripen their seed and perish the same season. There are some, such as Verbena, Eschscholtzia and others, cultivated as annuals, that are only such in a northern climate, being in their own congenial region biennials and perennials.

Biennials are those which grow the first season, flower the next, and then die. They may sometimes be induced to flower for two or three successive seasons, by preventing them from going to seed.

Perenulals are those which live and continue to blossom several years. If planted very early in borders, or brought forward in windows or hot-beds, they will bloom the first season. Many of them are hardy enough to stand the coldest of our Winters, dying down every season, and coming up in the Spring from the old roots.

CULTURE.

Hardy Annuals, or most of them, may be sown out of doors in April or May, in the Middle and Eastern States, and some of the hardiest the last week in March, if the ground is in a condition to work, but the time for sowing seeds varies with the latitude. It is well to start some varities in pots or pans in the house, and transplant them when the weather permits, as a succession of bloom is thus obtained; those started out of doors coming on later. Any shallow pot or pan will do for starting seed, provided there is good drainage at the bottom, so that superfluous water can escape. Free access of air is very important, and this is interfered with by an excess of water in the soil. In planting out of doors, sow the seed evenly on borders of finely pulverized earth, leveled off, covering not over an eighth of an inch; press gently down with a board, shade from the sun, and water when necessary with a fine rose. When large enough transplant into a good mellow soil. [They will, if sown in August and September, grow sufficiently large to stand the Winter, but should be protected by a slight covering of litter or straw. Transplant in the Spring and they will produce very early flowers. Half-hardy kinds, being more tender, will not bear hard frost, and should not be sown in the open ground before the middle of May. Tender Annuals can hardly be brought to perfection without starting in the house or hot-bed. They can be started in March and April, in pans or pots of well-pulverized soil. Sow thinly, place in a gentle heat, and shade from the sun till well up, after which place near the glass, giving a little air on fine days; when strong, pick out in small pots, giving the same treatment as before till well established. Transplant when large enough and out of all danger of frost. Will do well if sown in open ground the first of June.

Bienuials and Perennials may be sown in the Spring as early as annuals—they need the same treatment, and should be planted out the following Autumn in situations where they are to flower. Can only be sown in the Autumn, selecting as cool and damp a bed as possible, keeping the ground shaded and moist by frequent waterings until plants appear.

Green-house Seeds should be sown in pots or pans half full of drainage; cover this with rough siftings of mould, and the surface with fine soil, moisten, using a fine rose. Sow seeds evenly over the surface, cover very lightly, keeping from the rays of the sun until the plants show the third leaf, then transplant into seed pans three-fourths of an inch apart keeping them under a frame until perfectly recovered, giving a little air to strengthen them. As soon as they begin to touch each other, transplant into small pots and keep in a cool, airy part of the green-house near the glass, repotting them when necessary.

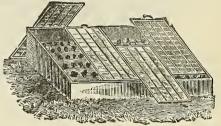

Soil. The preparation of the soil, especially for sowing the smaller kinds of seeds, is of the greatest importance, the success or failure depending largely upon it. A mellow loam, which is a medium earth between the extremes of clay and sand, made rich with leaf mould, and *thoroughlyrotted* manure, well mixed and made fine, form a light, friable soil, through which young plants can easily penetrate, and which will not

bake in the sun after watering. If the soil is heavy, add more leaf or sod mould, or manure in proportion; but always remember that the fertilizer must be well rotted, and, as well as the soil, thoroughly pulverized.

Sowing. Most seeds are planted too deep. From this cause they often fail to grow, and the seed is pronounced worthless. Great care should be taken in sowing. As a rule, cover only to the depth of the thickness of the seed, but plain, large seeds, like Sweet Peas, Morning Glories, Lupins, etc., one inch; Asters, Balsams, etc., one-half inch; Coxcombs or Celosias, etc., one-quarter inch. Place the finest seeds on the surface, having first pressed the earth down firmly, merely dust them over with a little earth and gently press down with a smooth board. In dry weather be sure to water every evening. When the plants first appear above ground, protect them from the direct rays of the sun. In Planting, remember that soaking in warm (not hot) water will

greatly hasten vegetation of Cypress Vine, Canna, and other hardshelled seeds, which are very slow to germinate. The ground should be kept free from weeds, and the earth should often be loosened, so that the plants may have the benefit of the rains and dews.

Hot-bed for Seedlings. In making a hot-bed the preparation of manure is a matter of importance, and it should be well worked previous to being used, if the bed be expected to retain its usefulness

for any length of time. If obtained fresh, and found to be too dry, it should be well watered and thrown lightly together to ferment; this will take place in a few days, and from three to four days afterward it should be completely turned, shaken and mixed ; a second turning may be required, although one is usually sufficient. When thus cleaned of rankness the bed can be made. The place should be chosen where it is dry underneath, sheltered from the north as much as possible, and fully exposed to the sun. It should be built up from two feet six inches to four feet high, and wider by six inches every way than the frame to be placed upon it. The manure should be well shaken and mixed while being put together, and firmly pressed by the feet. The frame should be placed on this and kept close until the heat rises, and three or four inches of sifted sand or light soil placed on the surface of the bed. In a few days it will be ready for use; but air should be given night and day while there is any danger from the rank steam. If the sand o: soil are drawn away from the sides of the bed, they should be replaced. When the hot-bed is used for seed only, nothing further is necessary Seeds should be sown in pots or pans, and plunged or placed in the bec. the heat of which will soon cause them to germinate; as this will after some time decline, a lining should be added, that is, fresh, hot, fermented, but not rank manure, applied about a foot in width all around the bed ; this will renew its strength.

Cold Frames are formed by placing an ordinary hot-bed frame upon a bed of light, rich soil in some warm, sheltered place in the garden, where it will be protected from cold winds. They should both be shaded from the sun by mats during the middle of the day and covered at night.

In Watering, use water that has been long enough exposed to the air to have acquired its temperature, or some that has been correspondingly tempered by artificial means; distribute in the evening through a fine rose, for thus it will neither disturb the soil over the growing seed, nor injure the buds and expanding foliage of either the young or old plants.

A (-) indicates a repetition of a variety ; a (*) a climber.

ASTER PEONY-FLOWERED PERFECTION.

ABRONIA.

A pretty trailing annual, bearing clusters of elegant Verbena- tike flowers of great fragrance, remaining in bloom a long time; very effective in beds, rock-work or hanging baskets. Half- hardy annual. Fer Abrouia arenaria, pure waxy yellow, 6 in	pkt. 05 05

NASTURTIUM DWARF (Tropæolum nanum).

PHLOX PERENNIAL.

CHINESE PRIMROSE.

PHLOX STAR OF QUEDLINGBURG.

PANSY (Heartsease), Viola Tricolor.

A well-known favorite, producing a profusion of brilliant flowers. Picking off the buds as soon as they appear during the Summer will cause the plants to grow bushy and compact; they will bloom profusely during the late Autumn and early Spring months. Prefers a moist, shady situation; cover during the Winter months. Seed sown in August or September, kept in a cold frame through the Winter, and planted out in the Spring, will blossom the whole season. Hardy perennial.

PHLOX DRUMMONDIL.

05 05

PETUNIA.

A very profuse flowering plant, of easy culture, with brilliant and various colors. Flowers the whole Summer. The double flowers are produced by fertilizing single flowers with pollen of the double, and even when done with the greatest care is not likely to be successful. Seed producing forty per cent of the double flowering plants of good quality is considered first-class. *Half-hardy perennial*.

Twenty-five Varieties of Choice Annual Flower Seeds, Our Own Selection. Put up in Boxes, with full directions for their culture. Sent by Mail on receipt of \$1. 12 Packets for 50 cts.

Flowering Plants and Vines.

All Plants will be sent by Express. We do not send plants by mail, as we not only can send larger plants by express, but they arrive in a much better condition, as the soil does not have to be taken as clean from the roots, whereas in sending by mail the earth has to be almost entirely removed, the plants are small and it takes some time for them to revive, and they often perish. We can supply the latest and best varieties of the following plants, besides many other kinds.

Begonias, Cannas, Carnations, Chrysanthemums, Coleus, Crotons,

Geraniums, Heliotropes, Palms, SEE PAGE 44.

Pansies, Petunias, Primrose, Roses, for bedding, Roses, in collection, Tuberoses potted,

Verbenas, Violets, etc., etc.

Price of Flower Seeds by Weight.

By mail, post-paid at prices named, in not less quantities than one-half ounce.

VEGETABLE PLANTS AND ROOTS, See Page 23.

GLADIOLUS are great favorites. They are of very easy culture and succeed well in sandy loam. If strong manures are used in the soil, it causes the colors of the flowers to run into each other, and gives them an indistinct appearance. They can be planted singly, in groups or in beds. Plant from 2 to 4 in. deep, according to size of bulb, and as they grow up, tie to a light stake about 2% ft. high. Should be taken up when frost has killed the leaves, dried in the sun, the stalks cut off an inch from the root. Keep them in a warm, dry cellar through the Winter.

TUBEROSES.

The most satisfactory of all the Summer blooming bulbs. Each bulb sends up a stalk about three feet high that throws from twenty to thirty flowers, and each flower may be said to be a bouquet in itself, so sweet and fragrant are they. They require a warm, rich soil, and a long season. Pot in February or March, and in the latter part of May transfer the plant into open ground. They can be planted in open ground as soon as danger of frost is over. planted from the first to the middle of May, in a warm, sunny location, they should produce flowers early in Before potting remove all the off-shoots or July. little bulblets and the dry roots, which, if not done, is apt to prevent blooming. Ea. Pr. doz.

Albino Tuberose—A very early single flowering variety, with very large and evenly filled spikes of pure waxey white flowers. They flower in July and throw from z to z flower stems from a single bulb, 5 and 8 cents each; 50 and 75 cents per dozen.

DWARF FRENCH CANNAS. These have at tracted much attention for the last few years. The large size and brilliant coloring of the flowers, and the freedom with which they bloom, make them most attractive for bedding plants. Every shoot blooms, and as often as a truss fades another takes its place, and each stem blooms 3 or 4 times in succession. As the plants throw up a number of shoots they form a mass of gorgeous bloom constantly. The stalk is dwarf, growing about 3 feet high Crimson, yellow, yellow spotted crimson, cherry, salmon yellow edge, scarlet, bordered yellow, orange, scarlet, etc., etc. Roots 15 cts. each; \$1.50 per dozen.

CANNA EHEMANI. Resembles Musa or banana. 20 cts. each.

CANNA ROBUSTA. This variety has a broad variegated leaf, growing well in good soil; fine for ornamental purposes, 12 feet high. Bulbs 20 to 50 cents each.

CANNA. Mixed sorts 10 to 15 cts. each.

LILLY OF THE VALLEY. A well known perennial, bloom ing early in the Spring Foliage rich green, flower stalks graceful and slender covered with pure white bell-shaped flowers of the gleatest fragrance and beauty. CLUMPS, 25 and 50 cents; by mail 20 cts. extra AMARYLLIS FOR-MOSISSIMA, or JA-COBEAN LILY. These bulbs produce flowers of a rich violet hue and beautiful appearance Each 15 ets.; per doz. \$1.50

CALADIUM ESCULENTUM. A well-known tropical plant, growing to the height of 4 or 5 feet, with a corresponding breadth. The leaves are of immense size and of brilliant green, streaked with white, often measuring 2 feet in length by 1½ feet in width; very showy, fine for lawn, door yards, etc.; bulbs, 25 and 50 cts. each, according to size.

DOUBLE DAHLIAS are well worthy of culture. The variety and beauty of its blossoms, and profusion in the late Summer and Autumn, when there are few handsome flowers in bloom, make it a great favorite. It will grow well in almost any good soil, except wet, heavy clay. Set about 3 feet apart; when out of danger of frost allow only one shoot to grow; tie to stakes as it advances, trimming off the lower side shoots, keeping it moderately wet in dry weather. The tubers should be taken up before the ground freezes, and laid away in a dry, warm cellar till Spring. Bright Claret, White, Crimson, Red, Amber, Rose, Yellow, Salmon, Variegated, etc., etc., 20 cents each ; \$2.00 per doz.

Dwarf Bouquet Dahlias, assorted colors, 20 cents each; \$2.00 per doz. White, 20 cents each; \$2.00 per doz.

SINGLE DAHLIAS. This section of the Dahlia family has now become exceedingly fashionable, on account of the value attached to the cut blossoms. The flowers range from 3 to 5 inches in diameter, with a bright yellow center, surrounded with petals of all shades of scarlet crimson, rose, yellow, orange, white ; 20 cents each ; \$2.00 per doz.

The product of the production of the pr

PEONIES. The Peony is perfectly hardy, and succeeds in NYMPHÆA under water during Winter. Double Rose, Double Sweet Scented. Roors, 20 cts. each ; \$2.00 per doz.

Gloxinia Bulbs, mixed varieties, 25 cts. each; \$2.00 per doz.

MADEIRA or NIEXICAN VINE, Large buibs, 10 cents each ; \$1.00 per doz. Good buibs, 5 cents each ; 50 cents per doz. DOUBLE TUBEROSE.

NEW TUBEROUS-ROOTED BEGONIA. (Laing's un-

rivaled strain.) These are bound to become most popular for open-air bedding. As they become better known, they will be grown everywhere. From the time the first bloom appears until all growth is stopped by frost, they are never out of bloom, and are covered with great wavy flowers from 3 to 5 inches across — borne in such profusion that the rich, glossy, green foliage is almost hid. den under the blossom. They surpass in gorgeousness and beauty any of the bedding plants. They proness and beauty any of the bedding plants. They pro-duce many colors varying through all the shades of crimson, scarlet, orange, yellow and white. They are not grown to the extent they should be, as they require no more care than Geraniums, and have as fine a range of color, and will bloom continually, even where Geraniums droop through lack of moist-ure. Planted in Rockeries, Flower-beds or Borders, they rival the Geranium with their rich and varied colors. The bulbs succeed well in any good soil, and will do well in a shady situation. The bulbs should be taken up in the Fall and laid away until Spring in a dry, cool place. Single-flowered bulbs of scarlet, yellow, white und crimson, 15 cents each : \$1.50 per doz.

the center of each leaf; perfume like orange blossoms. 20 ccnts each; \$2.00 per doz.

Strawberry plants at dozen rates mailed without extra charge; at 100 rates for 50 cents extra per hundred.

POTTED STRAWBERRY PLANTS.

The most favorable time for transplanting Strawberries is during the Spring months. A bed planted in April or May, and well cared for during the Summer, will produce a full crop the following season. When it is not practicable to set out in the Spring, a full crop may be obtained the next season by planting pot-grown plants during August or September. These have been layered in pots, and taken out and transplanted with the entire ball and every root the plant has made. After August first, we can furnish pot-grown plants of most of the above varieties at \$2.00 to \$2.50 per fifty; \$3.50 to \$5.00 per hundred. Pot-grown plants cannot be sent by mail.

HAVE YOUR PLANTS SENT BY EXPRESS. When plants are sent by mail they often die, because so much earth has to be taken from the roots. Where it is possible, therefore, it is much better, and in the end more economical, to forward by express. When sent by freight they are entirely at the risk of the purchaser. This applies to Flowering and Vegetable Plants, also. We make no charge for packing.

CONTINENTAL LAWN MOWER.

This machine has the cutting bar in the rear, which adapts itself to any uneveness in the ground. The gearing is completely covered, which keeps it from clogging. The rachet has no spring, which makes it silent in its operation. It is made to run at high speed, and will cut high grass, leaving the lawn perfectly smooth. It is light and easy to work; easily kept in order.

LAWN GRASS AND LAWN DRESSING, See Page 24.

PLANT BED CLOTH AS SUBSTITUTE FOR GLASS SASH

3 820

ON HOT BEDS AND COLD FRAMES.

This will be found an excellent substitute for glass (at one-tenth the cost) in protecting all kinds of seeds and plants on which glass sashes are used in early spring. It is safer, in fact, than glass, as it protects at night, while the temperature is not raised too high during the day-as is the case with glass sashes unless great care is given in ventilating-and being light and portable, it can be sent into sections where it would be difficult to get sash. The patent treatment given the cloth fills the threads and fibres and preserves them from decay, and also renders it tougher, heavier and stronger, and prevents it from shrinking after getting wet, and, to some extent, sheds rain. We furnish this cloth in one yard widths, and in any number of yards desired, as follows :

Heavy grade Waterproof, per yard, 14., by piece of about 40 yards, 13c. per yard.

FOT OR PLANT LABELS.

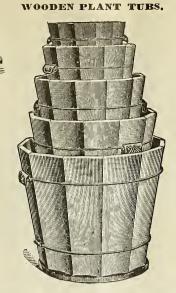

Scollay's small size, 75c. Scollay's large size, with valve. \$1.00.

Cahoon Broadcast Seed Sower.

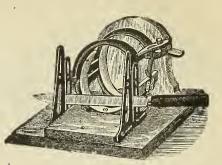

For Sowing Wheat, Oats, Barley, Rye, Buck-wheat, Grass Seed, Clover, &c., &c. It sows from 4 to

8 acres per hour at a common walk, throwing from 15 to 40 feet wide, thus saving a great deal of labor and oneof labor and one-third of the seed. A person entirely un-used to sowing by hand can use this machine with per-fect success. The machine with per-fect success. The ordinary work of a day can be done with this sower in three hours. The bag and hopper will hold about 22 quarts, as much as a man would wish to carry. **Price**, \$4.00. Whip Seed Sower, \$3.

Corn Shellers.

The Challenge, Single Hole, Right-Hand Corn Sheller has wrought iron shafts, and is well made from selected material. It separates the corn from the cob, and when used with the fan, cleans the corn of chaff and dirt.

Price, with Fan, \$8,

ACME ASPARAGUS BUNCHER, a greatly improved pattern, with adjustabl knife guide and movable head, with automatic catch for binding any size bunch. Price, \$2.50.

SMALL'S CALF FEEDER.

The advantage of this feeder is that it saves the trouble of teaching a calf to drink, and is a perfect substitute for nature, the calf sucking its food slowly and in the natural way. It holds seven quarts, and is sent complete for use. Price, \$2.50.

CALF WEANERS, 50c. 75c., \$1.00.

SILVER MILKING TUBES.

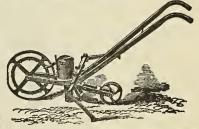

Every owner of a cow should have one. Price by mail, Postpaid, 75 cts. and \$1.00.

THE PLANET, JR., COMBINED DRILL, WHEEL HOE, WHEEL CULTIVATOR AND WHEEL PLOW. As a Drill, it sows all kinds of seeds perfectly, marks out the next row and holds one quart. As a Plow, it opens furrows, covers them, hills, plows to and from, etc., etc. As a Hoe, it works safely and closely to and from both sides of the row at once, at the critical time, when plants are small and weeds abundant, or between rows as plants be come larger, working all rows from 8 to 16 in. wide at one passage. As a *Cultivator*, it is admirably adapted to deep mellowing of the soil. **Price, \$10.50**.

Matthew's Seed Drill, Price, \$7.50.

It opens the furrow, drops the seed accur-ately at the desired depth, covers and lightly rolls it, and at the same time marks the next row, all of which is done perfectly by simply propelling the drill forward. It sows evenly and rapidly. It has an agitator, which stirsthe seed in the hopper and assures uniform deliv-ery, and will sow the seed to any depth. **Price**, \$7.50.

INSECTICIDES.

SLUG SHOT is an infallible insecticide. It is an impalpable powder, a combination of insecticides *poisonous* to insects preying upon ve getation, and withal an excellent fertilizer, affecting nearly all classes of insect life, so that they either die or leave for parts unknown. Slug Shot has been used since 1880 in thousands of

gardens and upon acres of field crops with conceded effectiveness upon Slugs, Worms, Caterpillars, Aphides, etc. It is in use in greater or less degree in every State in the Union, and each Canadian province, Egypt and New Zeland.

IS SLUG SHOT SAFE TO USE? The best and completest answer to make is its record. Two and a half million pounds (2,500,000) have been made up, and within a small fraction used as above stated; and so far as known, without any ill effect to man, beast or fowl, whether by handling, inhaling its dust or partaking of fruits or vegetables upon which it has been used. Its odor and color prevent its being taken for any wrong purpose, and enough cannot be eaten unless done deliberately and forcibly, to cause harm, and it has not transpired that this is feasible. It kills potato bugs in all stages of their growth, BUT NOT THE EGGS. It kills the Black Fleas on Cabbage, Turnips, Beets, Radishes and Egg Plants. Apply by dusting. It kills the Cabbage Worm, and also the Currant and Gooseberry Worm, the Aphis or Green Fly on roses and other flowers. Keeps the Striped Bugs from all Vine Crops. It is applied by duster or bellows.
